Our Belief Better Science Better Tomorrow

— Since 2004 —

ABOUT US.

INBIOS INDIA began its journey in 2004 with Inbios International Inc.USA. After validating and popularising its RK-39 Kalazaar rapid test we went forward with introducing other products in India. Since then we have added a number of products in our portfolio to cater to the exponentially growing demand in the healthcare sector. It's team of well experienced professionals has been successful in establishing fruitful alliances with diagnostic leaders to source their technology and consumables for the benefit of the people of India. It has withstood the test of time and has been successful in penetrating India's diverse and complicated marketplace.

We have made network all across India, with over 120 distributors who supply our products. We also have more than 50 direct customers (including hospitals, reference labs and research institutes). We are currently a team of 15 members for diagnostics and research.

Vision & Mission

We have planned to expand our business by adding Molecular Diagnostics/ Instruments in our portfolio. We are in a process to start class manufacturing unit at Delhi and the plant size is more than 5000 square feet area.

We have plan to manufacture Real Time PCR kits, Serology kit, Rapid and Biochemistry, Elisa etc. We are expanding our sales and technical team to all major city and state.

Biopanda TB-Gold ELISA

Diagnostic Kit for Human Tuberculosis Using the Combined ELISA & IFN γ Release Assay
(An Innovative Solution for TB Control)

Analytical sensitivity	Specimen	Measurement range	Package	Shelf life
0.15625 IU/ml	Freshly-collected Whole blood	0.15625 IU/ml to 10 IU/ml	96 wells (for 27 samples)	12 months

Overview of the IFN γ Assay Technology

The TB-ELiFN kit is based on the combination of IGRA technology and enzyme-linked immunosorbent assay (ELISA) test systems; to measure the interferon gamma (IFN γ) released by memory T cells in human whole blood through *in-vitro* stimulation with specific MTB antigens

TB-ELiFN Features

Specific antigens employed in the kit are identified only in MTB; not in BCG strains or most non tuberculosis mycobacteria. No cross-reactivity is found with other cytokines, e.g. IL-2 (40 ng/ml), IL-4 (5 ng/ml), IL-5, IL-6, IL-8, IL-10, IL-12 (100 ng/ml)

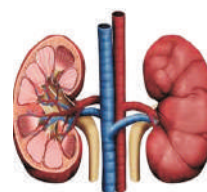

A high throughput ELISA test system :- Specificity at 96.23% is reached with healthy volunteers

No separation of T cells is required:- Sensitivity at 94.23% is reached with active TB patients

KIDNEY STONE ANALYSIS KIT

Complete kit for the identification of chemical elements in kidney and urinary stones:

- Semi-quantitative colorimetric detection of calcium, magnesium, ammonium, oxalate, phosphate, uric acid and cysteine.
- Mathematical procedure to identify main chemical compounds responsible of kidney stones.

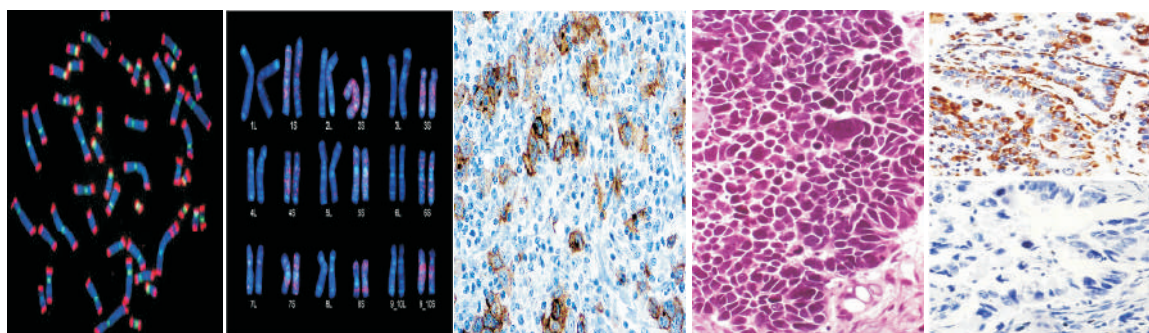

Type	Population	Main Cause
Calcium oxalate (Whewellite)	80 %	Alkaline urine
Magnesium ammonium phosphate (Struvite)	10-15 %	Alkaline urine
Calcium hydrogen phosphate (Brushite)	5-10 %	Acidic urine
Ammonium urate/uric acid	5-10 %	Kidney infections
Cysteine/Cystine	1-2 %	Rare genetic disorders

quartett IHC & FISH reagents

A well known **GERMAN** company renowned worldwide for its specialized product profile in manufacturing and modification of synthetic peptides with HPLC purity > 95 % including protease inhibitors or peptides for antibody production.

The expertise of Quartett is the production of a variety of reagents for histology, cytology, FISH and immunohistochemistry **including > 8000 antibodies** and detection systems. All products are exclusively manufactured in Germany without outsourcing any production step.

BVBLUE® Test

FOR THE DETECTION OF SIALIDASE ACTIVITY FROM GARDNERELLA, BACTEROIDES, PREVOTELLA, & MOBILUNCUS

The BVBLUE Test is an enzyme activity test for use in the detection of vaginal fluid specimens for sialidase activity, an enzyme produced by bacterial pathogens such as *Gardnerella vaginalis*, *Bacteroides spp.*, *Prevotella spp.*, and *Mobiluncus spp.* The BVBLUE Test is indicated for use in women suspected of having Bacterial Vaginosis (BV) infection, e.g., women with vaginal discharge typical of BV and/or women with previous history of BV, as an aid in the diagnosis of BV infection. Test results should be considered in conjunction with other clinical and patient information.

TEST PROCEDURE / RESULTS

Urine Reagent Strips

DSI Urine Reagent Strips are dip-and-read test strips for the rapid determination of Leukocytes, Nitrites, Urobilinogen, Glucose, pH, Specific Gravity, Blood, Ketones, Bilirubin, Protein, Micro Albumin, Creatinine, Ascorbic Acid (Vitamin C) in Urine. These are used for preliminary diagnosis and initial screening of health conditions by doctors, laboratories and also end-users. They provide information regarding the status of carbohydrate metabolism, kidney and liver function, acid-base balance, and urinary tract infection.

These easy to use strips offer stable colour development and the results can be viewed manually or quantified by the help of an instrument. It is designed to be resistant to Vitamin C interference for excellent and reliable test results.

Specialised Micro-Albumin/ Creatinine test is used to diagnose Micro-albuminuria (an early marker for Diabetic Nephropathy) by Micro-albumin/Creatinine ratio and a simple test for effective management of kidney disease in patient with diabetes and potentially high risk for kidney problem in early stage.

Veterinary Elisa kits

FINE TEST NOVAT ECH-GERMANY BIOASSAY TECHNOLOGY

Inbios India provides a variety of ELISA kits for the quantitative detection of veterinary infections, zoonotic pathogens as well as veterinary drugs that facilitate the research or clinical treatment of veterinary science .

Vast range of veterinary ELISA kits available with us.

Few fast moving Vet ELISA kits as under

- Brucella ELISA
- Chicken Infectious Bursal Disease (IBD)
- Canine Parvovirus (PPV)ELISA Kit
- Mouse NFkB-p65(Nuclear K-Factor Bp65)
- Chicken new castle Disease virus antibody
- Canine Troponin-I ELISA Kit.
- Mouse hs -CRP
- NSP ELISA
- Bovine NEFA(Non-ester fattyacid)
- Canine -IFN(InterferonGamma)
- Chicken bFGF/FGF2 (Basic Fibroblast Growth Factor)
- Chicken IGFBP-3(Insulin Like Growth Factor Binding Protein3)
- Goat IGF-1(Insulin like growth factor-1)
- Mouse IGF-1(Insulin like growth factor-1)
- Mouse IGFBP-3(Insulin like growth factor binding protein-3)
- Bovine LIF(Leukemia inhibitory factor)
- Camel IgG(Immunoglobulin-G)
- Camel Pepsinogen(Pepsinogen)
- Canine IL-10 (Interleukin10)
- Canine TNF α (Tumor Necrosis Factor Alpha)
- Canine VEGF (Vascular Endothelial cell Growth Factor)
- Porcine ANP(Atrial Natriuretic Peptide)

Note: For other Vet kits.Please contact Inbios India

Herpes simplex virus (HSV) (1 & 2)+ Varicella-Zoster virus (VZV)
CMV + EBV + HHV6 / HSV1 + HSV2 + VZV

SLAN 96 DUAL BLOCK

CE-IVD Kits

Hepatitis C Viral RNA MAG

Sample Type: Serum, Plasma
Genotype detection : 1-6

Genotyping

Sample input:- 200µl
Linear range:-
500 IU/ml to 5x10⁹ IU/ml
Sensitivity:- 1000 IU/ml

Quantitative

Sample input:- 200 µl
Linear range:-
50 IU/ml to 1x10⁶ IU/ml
Sensitivity:- 25 IU/ml

HIV RNA Quantitative MAG

Sample Type: Serum, Plasma
Genotype detection : A,D,F,J,AE,AG,N,O
Sample input:- 500µl
Linear range:- 50 IU/ml to 5x10⁸ IU/ml
Sensitivity:- 50 IU/ml

NOR	Norovirus GI + GII
SCY	Salmonella, Campylobacter & Yersinia enterocolitica
SCS	Salmonella, Campylobacter & Shigella/EIEC
CLJ	Campylobacter coli, C. lari & C. jejuni
AEY	Aeromonas spp + Yersinia enterocolitica
BLD	Blastocystis hominis + Dientaeba fragilis
EEE	E. coli EHEC, EPEC & EIEC
CLA	H. pylori + Clarithromycin resistance
CDA	Clostridium difficile toxins A+B
KGE	Cryptosporidium, Giardia & E. histolytica

ABR	Flu A, Flu B & RSV
PIZ	Parainfluenza (1, 3 & 2, 4)
HXN	Flu Typing II (H1N1, H5N1, H3N2 & H7N9)

AMB	Adenovirus, Metapneumovirus & Bocavirus
RPA	Respiratory Panel I [(Flu A, Flu B & RSV) + (H1N1, H5N1, H3N2 & H7N9)]

RHE	Rhinovirus + Enterovirus
-----	--------------------------

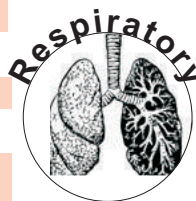

MER	MERS Coronavirus
-----	------------------

COR	Coronavirus (229E, NL63, OC43 & HKU1)
-----	---------------------------------------

BDT	Bordetella (<i>B. pertussis</i> , <i>B. parapertussis</i> & <i>B. holmesii</i>)
-----	---

CML	C. pneumoniae, M. pneumoniae & L. pneumophila
-----	---

HSM	H.influenzae, S. pneumoniae & M. catarrhalis
-----	--

ZDC	Zika, Dengue & Chikungunya Virus
DES	Dengue Serotyping (Dengue 1, 4 & 2, 3)
WNV	West Nile Virus
FEV	Yellow Fever
MYV	Mayaro Virus
JEV	Japanese Encephalitis Virus
CCV	Crimean-Congo Haemorrhagic Fever
CHA	Parasite Trypanosoma cruzi (Chagas)

STD	N. gonorrhoeae, C. trachomatis & M. genitalium + T. vaginalis, U. urealyticum, U. parvum & M. hominis
-----	--

HHT	Herpes virus 1, Herpes virus 2 & Treponema pallidum
-----	---

HCT	H. ducreyi + C. trachomatis (LGV)
-----	-----------------------------------

CGT	C. albinans, G. vaginalis, T. vaginalis
-----	---

HPV	Human Papilloma Virus 16 + 18
-----	-------------------------------

HHZ	Herpes Virus 1+2 & Varicella Zoster Virus
-----	---

BJV	BK + JC Virus
-----	---------------

SLE	S. agalactiae, L. monocytogenes & E. coli
-----	---

HNS	H.influenzae, H.meningitidis & S.pneumoniae
-----	---

HHV	Human Herpes Virus 6, 7 & 8
-----	-----------------------------

MeltPro® Real-Time PCR Kits for Tuberculosis

MeltPro MTB/RIF Test Kit

Qualitative detection of rifampin resistance mutations in MTB

MeltPro MTB/INH Test Kit

Qualitative detection of isoniazid resistance mutations in MTB

MeltPro MTB/EMB Test Kit

Qualitative detection of ethambutol resistance mutations in MTB

MeltPro MTB/STR Test Kit

Qualitative detection of streptomycin resistance mutations in MTB

MeltPro MTB/FQ Test Kit

Qualitative detection of fluoroquinolones resistance mutations in MTB

MeltPro MTB/SL Test Kit

Qualitative detection of Second line Injectable

Drug resistance mutations in *Mycobacterium tuberculosis*

MeltPro MTB Test Kit

Suitable for the rapid qualitative detection of *Mycobacterium tuberculosis*

MeltPro Mycobacterium tuberculosis MsSpoligotyping Test Kit

Suitable for the rapid genotyping of MTB

MeltPro Mycobacterium identification Kit

Identification of 19 mycobacterial species

Leukemia Q-Fusion single fusion gene kits for

(AML1ETO, BCRABL1 p190, BCRABL1 p210, PMLRARα L, PMLRARα S, PMLRARα V, NPMRARα, PLZFARα, CBFβMYH11, TELAML1, FIP1L1PDGFRA, DEKCAN, TELABL1, MLLAF9, MLLAF4, E2A,PBX-1, MLL-ENL, SILTAL-1, MLL-AF10, AML-1MDS1/EVI1, E2A-HLF, SET-CAN, MLL-SEPT6, TEL-PDGFRB, TLS-ERG, MLL-ELL, MLL-AF17, NPM-1MLF1, MLL-AF1q, MLL-AF1p, AML1-MTG16, MLL-AF6, AML1-EAP, NPM-1ALK, CAL-MAF10, HOX11, HOX-11L2, EVI-1, Wt1)

MeltPro® Real-Time PCR kits for Pharmacogenomics

MeltPro NAT 2 Test

Detection of four common SNPs in NAT2 gene involved in the metabolism of isoniazid to assist clinicians to personalize isoniazid doses.

MeltPro HLA-B *15:02 Test

Detection of the HLA-B*15:02 allele to identify patients who may be at greater risk of Cabamazepine induced adverse reactions.

MeltPro HLA-B*58:01 Test

Detection of the HLA-B*58:01 allele to identify patients who may be at greater risk of Allopurinol induced adverse reactions.

MeltPro CYP2C19 Test

Detection of three SNPs in CYP2C19 gene to assist clinicians to determine therapeutic strategy for drugs that are metabolized by CYP2C19.

MeltPro Warfarin Genotyping Kit

Detection of four SNPs related to warfarin response to assist clinicians to manage the individualized administration of warfarin.

Real time PCR Reagents for Leukemia

Leukemia Fusion Genes (Q30) Screening Kit

Screening of 30 fusion genes resulted from chromosome translocations in chronic and acute leukemia,

AML Q Fusion Screening Kit

translocations in acute myelocytic leukemia
Screening of 16 fusion genes resulted from chromosome

ALL Q Fusion Screening Kit

Screening of 16 fusion genes resulted from chromosome translocations in acute lymphocytic leukemia

BCR ABL1 Genotyping Kit

Used for BCR ABL1 genotyping, including p190 isoform and p210 isoform in leukemia

PML RARα Genotyping Kit

Used for PML RARα genotyping, including V isoform, S isoform, and L isoform in leukemia

20 tests/kit

Drug resistance for MTB on Melt Prob

Better Solution for Molecular Diagnostics

MEDIVEN MEDICAL INNOVATION VENTURES

GenoAmp Real-Time PCR

Dengue\Chiku Combo

Zika\Dengue\Chiku Triplex

Tropical Fever (Whole Blood)
(*Leptospira* spp., *Burkholderia*
Salmonella spp., *Plasmodium*)

Leptospira spp.

Malaria-P.falciparum, P.vivax
P.ovale, P.malariae, P.knowlesi

Flu A/H1N1/H3N2/FluB/MERS- CoV

Parainfluenza 1-4

Adenovirus/Metapneumovirus/
Respiratory Syncytial Virus

MTBC/NTM

CT/NGU.spp.

TV/MG/MH

qPCR-HIV-1,M,N&O

ProDetect Dipstick

Drug Abuse Test
(AMP/BZO/MET/MOP/THC)

Drug Abuse Test
(5-in-1,4-in-1)

EVIDENCE-BASED

INNOVATIVE

INTEGRITY

RESPONSEBLE

VIRAL DETECTION

HBV QNP 2.0

Quantification of HBV
Genotypes A-F
Serum
10 IU/ml
2x10¹-2x10⁹ IU/ml

HCV QNP 2.1

Quantification of HCV
Genotypes 1-6
Serum
26 IU/ml
2x10²-2x10¹⁰ IU/ml

HIV-1 QNP 1.1

Quantification of HCV
Group M genotypes A-H
Serum
60 IU/ml
2x10²-2x10¹⁰ IU/ml

HDV QNP 1.0

Quantification of HDV
Genotypes 1-7
Serum
400 IU/ml
1x10³-1x10¹⁰ IU/ml

VIRAL DETECTION

CMV QNP 3.0

Quantification of CMV
ALL major types
Serum
48 copies/ml
2x10²-2x10¹⁰ Copies/ml

EBV QNP 1.0

Quantification of EBV
ALL major types
Serum
380 copies/ml
5x10²-5x10⁹ Copies/ml

Parvovirus B19 QNP 1.0

Quantification of ParoVirus
ALL major types
Serum
90 IU/ml
1.5x10²-1.5x10⁸ IU/ml

BKV QNP 1.0

Quantification of BKV
ALL major types
Serum, Plasma, Urine
32 copies/ml
1x10²-1x10⁸ Copies/ml

BACTERIAL DETECTION

VRE QLP 1.0

vanA and vanB genes
All VRE genotypes
Serum, Plasma
VRE: 100 Copies/ml

MTBC QLP 2.1

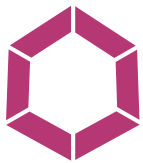

Detection of MTBC
MTBC FAMILY
Serum, Plasma, sputum,
CSF, alveolar lavage,
800 Copies/ml

JCV QNP 1.0

Quantification of JCV
ALL major types
Serum, Plasma, Urine
45 copies/ml
4x10¹-4x10⁹ Copies/ml

HSV QLP 2.1

Detection of genotype
HSV 1 & 2
Serum, Plasma
HSV-1: 100,
HSV-2: 10 Copies/ml

D I A C A R T A

PRECISION MOLECULAR DIAGNOSTICS

Q Clamp® Gene Mutation Detection Tests

Q Clamp KRAS Mutation Detection
(Codons 12,13,59,61,117 and 146)

Q Clamp NRAS Mutation Detection
(Codons 12,13,59,61,117 and 146)

Q Clamp EGFR Mutation Detection
(Codons 719,861,Ex19del,ex20insASV
and S768I,T790M and L858R)

Q Clamp BRAF Mutation Detection
(Codon 600)

Q Clamp JAK-2 Mutation Detection
(Codon 617)

Q Clamp PIK3CA Mutation Detection
(Codons 542,545 and I047)

ColoScape™ Colorectal Cancer Mutation Test
24 Reactions

RadTox™ cfDNA Test 96 Reactions

CRISPR-Quest Gene-Editing Event Screening Kit
500 Reactions

QFusion™ EML4-ALK and KIF5B-ALK
Fusion Gene Detection Kit- 20 Reactions

QuantiVirus™ HPV E6/E7 mRNA Test
for Cervical Cancer-96 Reactions

QuantiVirus™ HPV E6/E7 mRNA Test
for Head and Neck Cancer-96 Reactions
